PROGRAM – 5

Date:27/05/2025

Objective: Implement error handling techniques using exception handling.

```
class Exceptiondemo {
 void checkNumber(int n) {
  if (n < 0) {
 System.out.println("Number is invalid.");
  throw new IllegalArgumentException();
   } else {
  System.out.println("The number is valid: " + n);
     }
  }
  public static void main(String[] args) {
 Exceptiondemo obj = new Exceptiondemo();
  int n = -5;
  try {
   System.out.println("Checking number validity...");
   obj.checkNumber(n);
     }
  catch (IllegalArgumentException e) {
  System.out.println("An exception is occured.");
     }
   finally {
   System.out.println("The program has ended.");
     }
  }
}
```

OUTPUT

```
C:\Users\ASUS\OneDrive\Desktop\java>javac Exceptiondemo.java

C:\Users\ASUS\OneDrive\Desktop\java>java  Exceptiondemo
Checking number validity...
Number is invalid.
An exception is occured.
The program has ended.

C:\Users\ASUS\OneDrive\Desktop\java>
```
