Task – 02 (Flow control in Python)

1. Write a python program to check given number is even or odd.
2. Write a python program to find greatest number in two numbers.
3. Write a python program to find roots of quadratic equation $ax^2+bx+c=0$.
   root1=(-b+math.sqrt(b*b-4*a*c))/(2*a)
   root2=(-b-math.sqrt(b*b-4*a*c))/(2*a)
4. Write a python program to take coordinates of a point as input and determine its quadrant.
5. Write a python program to compute gross salary based on following parameters:-

Basic Salary	HRA	DA
1-4000	10%	50%
4001-8000	15%	60%
8001-12000	20%	70%
More than 12000	25%	80%

   gs=bs+hra+da

6. Write a python program to calculate electricity bill based on following parameters:-

Units	Bill/unit
1-150	2.40
For next 151-300	3.00
For next more than 300	3.20

7. Write a python program to print table of given number in given format:-
   2*1=2
   2*2=4
   2*3=6
   .

.

2*10=20

8. Write a python program to find factorial of given number.
9. Write a python program to find sum of digits of given number.
10. Write a python program to reverse the digits of given number.
11. Write a python program to convert binary number to its decimal equivalent.
12. Write a python program to check given number is prime or not.
13. Write a python program to print series of prime numbers in given range. Range must be created by taking input from user.
14. Write a python program to print Fibonacci series up to n terms, where value of n is entered by user.
15. Write a python program to check given number is Armstrong or not.
