Task – 01

1. Write a python program to print a message on screen.
2. Write a python program to take two numbers as input now find summation, subtraction, multiplication and division of two numbers.
3. Write a python program to find area and perimeter of circle.
   area=3.14*r*r
   perimeter=2*3.14*r
4. Write a python program to find volume and surface area of cuboid.
   v=l*b*h
   sa=2*(l*b+b*h+h*l)
5. Write a python program to find simple interest.
   si=(p*n*r)/100
6. Write a python program to find square root of a number.
   root=math.sqrt(n)
7. Write a python program to take number of days as input now display years, weeks and days. E.g. If user input 375 days then output will be 1 years, 1 weeks and 3 days. In this program ignore leap year.
8. Write a python program to compute area of perimeter of rectangle.
   area=l*b
   perimeter=2*(l+b)
